 **Horton**
EMERGENCY VEHICLES

Above: Sealed for your protection and designed for today's biohazard environment, switch panels are sealed to make decontamination a breeze — just wipe and go.

Horton Emergency Vehicles has combined logic control, solid state technology and multiplex technology to create the future of the emergency vehicle industry.

Visit us at FDIC, booth 2036, to see what the future has to offer your next ambulance or rescue truck.

Below: Multiplex Technology — Multiple commands are carried in each wire, eliminating separate wires for every feature, reducing radio frequency interference.

turn left flood on | 01 turn sweep lights off | 01 turn back up alarm off | 1'
